PROFESSIONAL SUMMARY

AI/ML engineer and integrated M.Tech student (CGPA 9.10/10) with hands-on experience deploying production ML pipelines, agentic AI systems, and cloud-native applications. Active Claude Code & GitHub Copilot user with 30+ shipped GitHub projects. Completed 272+ GCP labs earning 5+ Google Cloud certifications; experienced in Vertex AI, LLM APIs, edge AI, and full-stack development.

WORK EXPERIENCE

Generative AI Intern | SmartBridge (SmartInternz) – AICTE Approved

Nov 2025 – Jan 2026

- Designed and evaluated 3 production GenAI workflows using Vertex AI Studio, Gemini APIs, and Model Garden; benchmarked latency and accuracy across prompt configurations using Claude Code as primary AI coding assistant.
- Completed 272+ graded GCP labs (Kubernetes Engine, Cloud Run, Pub/Sub, BigQuery ML) earning 5+ concurrent Google Cloud certifications; recognised as Google Cloud Innovator (Dec 2025) among 5,000+ participants.

KEY PROJECTS

Agentic Honeypot | Python, LLM Agents, Cybersecurity

Feb 2026

- Built an autonomous AI-powered honeypot system using agentic LLM workflows to detect, log, and respond to intrusion attempts — demonstrating AI-first engineering and autonomous decision-making pipelines.

Diabetic Retinopathy Classifier | Python, EfficientNet-B4, Grad-CAM, PyTorch

Mar 2026

- Automated retinal fundus image grading using EfficientNet-B4 with Grad-CAM explainability; applied Ben Graham preprocessing on the APTOS 2019 dataset — deployed as a reproducible ML pipeline with full CI/CD.

Ethereum Validator Node Monitor & Dashboard | Python, Web3.py, Streamlit, Docker

Mar 2026

- Engineered real-time Ethereum mainnet dashboard tracking live block data and validator metrics via JSON-RPC; containerised with Docker Compose for one-command deployment, reducing manual monitoring by ~80%.

AccessiPilot – AI Browser Extension | TypeScript, LLM APIs, TTS/STT, OpenCV

Dec 2025

- Built an AI-powered browser extension auto-describing visuals, generating alt-text, adapting UI via voice commands, and enabling real-time speech-to-text — shipped and published as a production Chrome extension.

Crop Disease Edge AI | C++, Edge AI, TinyML, IoT

Nov 2025

- Deployed real-time crop disease detection model on MCU-class edge hardware in C++, demonstrating ability to ship AI inference in resource-constrained production environments.

Additional projects: Hindi AI Assistant (ASR+TTS+CV pipeline), SmartHelmet IoT Safety System, MERN Stack App, E. coli Resistance Prediction

TECHNICAL SKILLS

AI/ML & Agents: PyTorch, TensorFlow, Scikit-learn, LLM APIs, Vertex AI, Gemini API, Agentic Workflows, OpenCV, EfficientNet

Cloud & DevOps: GCP (5+ certs), Kubernetes, Docker, Terraform, Cloud Run, Pub/Sub, BigQuery ML, Jenkins, Linux

Languages: Python, TypeScript, JavaScript, C++, Java, SQL

AI Dev Tools: Claude Code, GitHub Copilot, Vertex AI Studio, Streamlit, Jupyter, Postman

Web & Backend: Node.js, Express.js, React.js, MongoDB, REST APIs, JWT, Django

Blockchain: Web3.py, Ethereum JSON-RPC, Proof-of-Stake, Validator Node Monitoring

EDUCATION

Vellore Institute of Technology Bhopal

2022 – 2027

Integrated M.Tech – Artificial Intelligence and Computer Engineering | **CGPA: 9.10 / 10**

ACHIEVEMENTS

- Google Cloud Innovator (Dec 2025) — 272+ graded GCP labs, 5+ cloud certifications with distinction.
- Research Published — E. coli Resistance Prediction paper accepted in African Journal of Biomedical Research; 91% ML accuracy.
- NPTEL Cloud Computing — Elite + Silver rank (top 5% nationwide).
- HackRx 4.0 (Bajaj Finserv) — Top-tier qualifier; built ML-based document forgery detection Android app.
- Core Volunteer, AI Club VIT Bhopal — organised 6+ workshops; outreach lead for Mood Indigo IIT Bombay (150,000+ attendees).
